Complejidad computacional

Computación I

¿EFICIENTE?

¿EFICIENTE?

Algoritmos

```
Entradas:
valores
valor_encontrar
encontrado <- false
for each valor in valores:
      if valor == valor_encontrar:
             encontrado <- true
return encontrado
```

Complejidad

O(¿?) Ω(¿?) Θ(¿?)

Algoritmos

```
Entradas:
valores
valor_encontrar
for each valor in valores:
      if valor == valor_encontrar:
             return true
return false
```

Complejidad
